

PCA Skin® Post-Peel Instructions

For two days post-procedure:

- Stay cool! Heating internally can cause hyper-pigmentation.
- Do not put the treated area directly into a hot shower spray.
- Do not use hot tubs, steam rooms or saunas.
- Do not go swimming.
- Do not participate in activities that would cause excessive perspiration.
- Do not use loofahs or other means of mechanical exfoliation.
- Do not direct a hair dryer onto the treated area.
- Do not apply ice or ice water to the treated area.

General guidelines:

- After receiving a PCA SKIN® professional treatment, you should not necessarily expect to “peel.” However, light flaking in a few localized areas for several days is typical. Most patients who undergo these treatments have residual redness for approximately one to 12 hours post-procedure.
- As with all peels and treatments, it is recommended that makeup not be applied the day of treatment, as it is ideal to allow the skin to stabilize and rest overnight; however, makeup may be applied 15 minutes after the treatment if desired.
- To minimize side effects and maximize results use the **Post-Procedure Solution** for three to five days or until flaking has resolved.
- If the skin feels tight, apply **ReBalance** for normal to oily skin types or **Silkcoat® Balm** for drier skin types to moisturize as needed. For maximum hydration, you can apply **Hydrating Serum** under **ReBalance** or **Silkcoat® Balm**.
- Moisturizer should be applied at least twice a day, but can be applied more frequently for hydration and to decrease the appearance of flaking.
- It is recommended that other topical, over-the-counter medications or alpha hydroxy acid products not be applied to the skin seven days post-procedure, as they may cause irritation.
- It is recommended to delay use of tretinoin, Retin-A®, Differin®, Renova®, Tazorac®, Avage®, EpiDuo® or Ziana® five days post-procedure. Consult your physician before temporarily discontinuing use of any prescription medications.
- Avoid direct sun exposure and excessive heat. Use **Weightless Protection Broad Spectrum SPF 45, Perfecting Protection Broad Spectrum SPF 30, Protecting Hydrator Broad Spectrum SPF 30** or **Hydrator Plus Broad Spectrum SPF 30** for broad spectrum UV protection.
- Do not go to a tanning bed for at least two weeks post-procedure. This practice should be discontinued due to the increased risk of skin cancer and signs of aging.
- Do not pick or pull on any loosening or peeling skin. This could potentially cause hyperpigmentation.
- Do not have electrolysis, facial waxing or use depilatories for approximately five days.
- **Do not have another treatment until your clinician advises you to do so.**
